# Nuclear Workforce Needs 

Idaho National Laboratory

Nuclear Staffing Plan Brief FY2020-FY2024*

Briefing Provided by Hope Morrow - Economist, Workforce Strategy \& Development

## Nuclear Industry Growth Requires Research and Operations Talent

## Demonstrate microreactor

- Resolve key advanced reactor issues
- Open new markets for nuclear energy
- Provide a 'win' to build positive momentum

Commercial microreactors deployed

## SMR-NuScale operating

## Naval Reactors Facility

- Naval Spent Fuel Handling Facility
- Cask Shipping and Receiving Facility and Overpack Storage Facility

## Versatile Test <br> Reactor (VTR) operating by 2026

- Re-establish leadership in fast-spectrum testing and fuel development capability
- Supported by microreactor demonstration
- Support non-LWR advanced reactor demonstration

## Non-LWR advanced demonstration reactors by 2030

- Demonstrate non-LWR technology replacement of U.S. baseload clean power capacity

## INL's Growing Nuclear Mission Requires Talent in Many Disciplines

## INL Offers Opportunities to Students in Various Careers Pathways:

- Research
- Program Support
- Maintenance and Technicians
- Construction

INL Integrated Nuclear Workforce Needs

## Data Parameters

- Timeline:
- FY2020-FY2024 for NS\&T, MFC, and ATR
- FY2020-FY2026 for VTR
- These are full-time INL employment opportunities. Future construction positions associated with these organizations, other part-time and contracted positions are not counted here.
- The Nuclear Workforce at INL is $36 \%$ of the total current lab workforce (i.e., employees, interns, postdocs, and Grad Fellows). The information presented summarizes careers in both research and operations/maintenance for the following four organizations:
- Nuclear Science and Technology (NS\&T)
- Materials and Fuels Complex (MFC)
- Advanced Test Reactor (ATR)
- Versatile Test Reactor (VTR)

## Data Parameters - What's Not Included

The other 64\% of Idaho National Laboratory's workforce specializes in a variety of fields supporting the nuclear research mission and the non-nuclear INL missions. Each of the following job categories also anticipate growth over the next five years, but those details are not provided in this briefing:

- Business Management
- Energy and Environmental Science and Technology
- Facilities and Site Services
- Governmental Affairs, Communication, and Education Outreach
- Human Resources
- Industry Engagement
- Information Management
- National and Homeland Security
- Safety, Health, and Quality

## Annual Projected Opening Counts

## 1,017 Total Anticipated Openings to

 support INL's Nuclear MissionThese openings consist of both research focused occupations and careers in operations and maintenance, thus resulting in workforce needs that vastly range in educational levels and discipline, as well as experience and background.

| Posting <br> Scope | FY20 | FY21 | FY22 | FY23 | FY24 |
| :--- | :---: | :---: | :---: | :---: | :---: |

The Versatile Test Reactor staffing plan extends to FY25 and FY26. Adding another 46 projected openings in FY25 and 6 projected openings in FY26.

## Work Discipline Groups

- For these purposes, occupations and projected hires will be categorized generally by work discipline:
- Including:
- Engineering
- Computer Engineering/Information Systems
- Science
- Facility Services/Operations
- Additional Occupations
- Managerial
- Business Services
- Technician
- Union Trade
