ANNOUNCEMENT: TECHNOLOGY MATURATION WEBINAR SERIES KICK-OFF

Program Announcement
FOR IMMEDIATE RELEASE
11/09/2022

The Fission Surface Power (FSP) Technology Maturation webinar series will kick off on [Tuesday, December 13](#). This quarterly webinar series will provide technical details of the current FSP technology maturation efforts at Idaho National Laboratory and Los Alamos National Laboratory.

The FSP technology maturation program aims to develop design-agnostic technologies for potential incorporation into industry designs. The FSP team is looking to share the latest progress and gather your feedback on our efforts and future direction.

Given the export-controlled nature of these webinars, *all participants must sign a non-disclosure agreement with INL before receiving their personalized link to the webinar appointment.*

If you are interested in attending the webinar, please email us at fsp@inl.gov. Our team will provide further instructions. Please feel free to forward this message to interested colleagues as well.
