

E-waste Crossword game

Across

3. Making something smaller in size, amount, degree, importance.
7. A system of trash and garbage disposal in which the waste is buried between layers of earth to build up low-lying land
8. General term that refers to all kinds of old, broken, unused, or unwanted electrical and electronic devices.
9. Using something again, either for what it was originally made for, or for a new purpose.
10. A silver-white hard malleable ductile metallic element (Ni, atomic number 28) capable of a high polish and resistant to corrosion that is used chiefly in alloys and as a catalyst.

Down

1. The process of converting waste materials into new materials and objects.
2. The presence of substances and/or heat in environmental media (air, water, land) whose nature, location, or quantity produces undesirable environmental effects
4. A chemical element with the symbol Cu, and it has the atomic number 29. This metal is soft, can be shaped easily, and stretches without breaking. It also conducts heat and electricity well.
5. A device containing an electric cell or a series of electric cells storing energy that can be converted into electrical power.
6. A soft silver-white element (atomic number 3) of the alkali metal group that is the lightest metal known and that is used in chemical synthesis and in storage batteries.
