

Mr. Carlo Melbihess, Director Facilities & Site Services

Mr. Melbihess leads an organization of some 600 staff providing a wide range of facility and support services across the INL. These services include facility management, site-wide utility operations, logistics, property management, infrastructure planning, engineering and construction services, fleet management and logistics, precision machining, calibration services, landfill operations, and food services. He is a career Battelle employee. He has over 22 years of experience managing a wide variety of laboratory support functions such as facilities management, operations and maintenance, fabrication, roads and grounds services, facility design, construction, renovation and demolition project management, and, laboratory protection and security services. Prior to joining INL, Mr. Melbihess worked in facilities and operations directorates at the U.S. Department of Energy's Pacific Northwest National Laboratory, Oak Ridge National Laboratory and Brookhaven National Laboratory. Previously, he was the deputy assistant laboratory director for Facilities and Operations at Brookhaven National Laboratory. He holds a bachelor's degree in civil engineering from the University of Washington in Seattle, and is a certified facility manager through the International Facility Manager Association.
